

Remarks

New claims 76-79 have been added wherein the sensor is an *"application-specific sensor"* where the *"application is chosen from the group consisting of radiation, chemical, temperature, shock, motion, aural, and visual detections."* It is respectfully submitted that support for the new claims 76-79 is found in the provisional application filed on January 24, 2003, entitled "Radnet: A Cellular Telephone-Based Radiation Detector Network" serial number 60/442361, by inventors William W. Craig and Simon E. Labov.

In the event that the Examiner finds any impediment to the present application that could be clarified with a telephone conference, he is respectfully requested to initiate the same with the undersigned at (925) 422-7274.

Respectfully submitted,

James S. Tak
Attorney for Applicant
